

Chemical Industry

INSTRUCTION FOR AUTHORS

The journal Hemijska industrija (Chemical industry) is publishing papers in the field of chemical engineering, chemical technologies and chemistry.

Articles for publication

Original scientific papers (up to 24 typewritten pages), research notes (up to 8 pages), preliminary communications (up to 6 pages), review articles (up to 36 pages), professional papers (up to 12 pages) and book reviews (up to 3 pages) will be published (text without Tables and Figures).

Preparation of Manuscripts

Manuscripts should be written in good English.

Typing

Type manuscripts with double line spacing on A4 size page leaving approximately 2.5 cm for margins. Use left margin to indicate positions for figures and tables. Number all pages of the manuscript including references, tables, and a list of figure captions.

Title page

Title page should contain: the title, full names of all authors and their affiliation. The name of the author, to whom the correspondence shall be addressed provided with complete address and e-mail address, has to be given at bottom of the page.

Abstract

An one-paragraph abstract of 150-200 words pointing out the essentials should be given and clearly set off from the text. Authors from Serbia and former Yugoslavia should submit on a separate page also an abstract in Serbian including the title and addresses.

Key words

Key words should be given after the Abstract.

Tables

Tables should be numbered consecutively in order to which they are referred by Arabic numerals. Each table should have a brief descriptive title. Footnotes to tables should be typed below the table and should be referred to by superscript lowercase letters. No vertical rules should be used. Tables should not duplicate results presented elsewhere in the manuscript (e.g. in graphs). Collect tables at the end of the manuscript.

Figures

Photographs, charts and diagrams are all to be referred to as "Figure(s)". Figures should be numbered consecutively in the order to which they are referred, and given a descriptive caption. Number of illustrations should be restricted to the absolute minimum. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used. Supply captions on a separate sheet, not attached to the figure.

Photographs

Photographs should be of high contrast, clear, black and white, glossy prints. Color photographs are also acceptable. Remove non-essential areas of a photograph. Where necessary (e.g. micrographs), insert a scale bar in the illustration (not below it), as opposed to giving a magnification factor in the caption.

Formulae and Equations

They must be written with great care using corresponding formula/equation editor. Equations should be numbered (1), (2) etc.

Units

Authors are requested to use SI units.

Symbols, terminology and abbreviations

Internationally accepted usage is recommended. Symbols and abbreviations should be used consistently.

Chemical nomenclature

Follow the usage of Chemical Abstracts whenever possible.

References

Indicate references in the text by numerals in square brackets in consecutive order. List references at the end in order of their appearance. Give names of all authors (do not use "et al."). Abbreviations of journal titles should conform to those adopted by Chemical Abstracts.

Examples

- [1] W.V. Smith, J.H. Cudra, H.N. Cambell, Kinetics of alkane pyrolysis, J. Chem. Phys. **15** (1958) 338–356.

Submission of Papers

Please submit your manuscript using our online submission service on the internet: www.ache.org.rs/HI/, by clicking arrow next to **OnLine Submission Form** text.

Offprints

Authors will normally receive 10 reprints without covers. There are no page charges for this Journal.

Reviewing

All manuscripts submitted to the Journal will be reviewed.

Proofs

Proofs in PDF format will be sent to the corresponding author via E-mail and should be returned within 3 days of receipt.
